

# Office building energy storage cost breakdown in Israel 2025

## Overview

---

Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's.

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region.

Reducing greenhouse gas (GHG) emissions further requires carbon-free power generation through higher carbon tax rates on natural gas and more energy-efficient buildings. SPECIAL FEATURE: ADDRESSING THE HIGH COST OF LIVING

Time: January 5, 2025 Location: Israel Core Equipment: GSL Energy 40kWh high-voltage rack-mounted energy storage system, DEYE three-phase hybrid inverter As a leading country in renewable energy development in the Middle East, Israel plans to increase the proportion of clean energy to 30% by 2030.

Figure ES-2 shows the overall capital cost for a 4-hour battery system based on those projections, with storage costs of \$147/kWh, \$243/kWh, and \$339/kWh in 2035 and \$108/kWh, \$178/kWh, and \$307/kWh in 2050 (values in 2024\$). Battery variable operations and maintenance costs, lifetimes, and.

More than 350 active startups are now developing solutions across energy generation, storage, infrastructure, and decarbonization. These companies

raised over \$400 million in private capital in the past year, reflecting strong investor interest even during a period of global funding caution.
