

# Outdoor solar panel monitoring

## Overview

---

Solar monitoring systems provide a real-time snapshot of solar energy production data from your home solar system. A good monitoring system can tell you when one or more panels (aka “modules”) isn’t producing.

There are three main types of solar monitoring systems: 1. Solar monitoring from equipment manufacturers 2. Solar monitoring from your installer 3. Standalone home energy.

No matter what solution you choose, solar monitoring has two basic functions: making sure your system is producing solar power and comparing that production over time to what you.
