

Palm solar

Overview

Are oil palm companies using solar?

Additionally, oil palm companies have incorporated solar technologies into their operations. For example, over 600 solar panels have been mounted on IOI Oleo's infrastructure, such as offices and manufacturing units, potentially supplying 487,000 kW/h of electricity annually and lowering around 300 tCO₂ emissions.

Are solar-powered palm trees making a difference at the World Expo 2020?

In preparation for the World Expo 2020, Dubai is rolling out solar-powered palm trees that will help visitors beat the heat while surfing the web. It's no secret that solar energy is making real progress around the world.

Is oil palm biomass a viable waste management solution for Malaysia?

Malaysia is one of the leading producers and exporters of oil palm, and the industry contributes significantly to the growth of the national economy. Nonetheless, the consequential oil palm biomass (OPB) with a potential yield of ~97 million tonnes annually presents both challenges and opportunities, demanding innovative waste management solutions.

Can solar-driven pyrolysis transform oil palm biomass into valuable commodities?

Nonetheless, the consequential oil palm biomass (OPB) with a potential yield of ~97 million tonnes annually presents both challenges and opportunities, demanding innovative waste management solutions. This paper explores the feasibility of converting OPB into valuable commodities by employing concentrated solar-driven pyrolysis.

How does solar power work?

The device, which gets its name from its palm tree-like design, uses solar energy to provide free wi-fi, charging stations, and much-needed seating and

shade from the region's sweltering heat (temperatures commonly soar into the 90s/100s in summer).

Why are 'smart palm' trees being installed in Dubai?

And it is doing so in original ways. As Dubai prepares for the World Expo 2020, "Smart Palm" trees have been installed throughout the city.
