

# **Permit plan pennsylvania energy storage**

## Overview

---

What is the Pennsylvania energy storage consortium?

The Pennsylvania Energy Storage Consortium will serve as an opportunity for engagement of key stakeholders on a wide range of topics that can lead to an advancement of storage capacity in PA. The Pennsylvania Energy Storage Consortium will meet on a quarterly basis and meetings are open to all energy storage stakeholders.

What is the energy storage permitting guidebook?

The goal is to develop an Energy Storage Permitting Guidebook that outlines best practices and proposes a standard process for permitting energy storage systems of less than 1 megawatt. Simplifying and standardizing permitting procedures for new storage systems will have benefits for authorities having jurisdiction (AHJs), installers and consumers.

When is the next Pennsylvania energy storage Consortium meeting?

The next Pennsylvania Energy Storage Consortium Meeting will take place May 24, 2023 from 1pm to 3pm ET. The seventh Pennsylvania Energy Storage Consortium meeting was held on March 22, 2023 via Teams video conference. The focus of the meeting centered on grid interconnection and the associated challenges, barriers, and proposed solutions.

What happened at the sixth Pennsylvania energy storage Consortium meeting?

The sixth Pennsylvania Energy Storage Consortium meeting was held on January 25, 2023 via Teams video conference. The focus of the meeting was on energy storage project case studies and the associated opportunities and challenges experienced. Information was provided by the Demonstrations Lead at Sandia National Laboratories.

What is energy storage and why is it important?

Energy storage has widespread potential application across the entire electricity value chain, which makes it a complex but important technology to enhance resiliency and reliability among our electricity grid, and maximize the benefits of the growing renewable energy sector in PA.
