

# **Photovoltaic M-type sink installation board tutorial**

## Overview

---

What is JinkoSolar photovoltaic (PV) installation manual?

Thanks for choosing JinkoSolar photovoltaic (PV) modules (hereafter referred to as “modules”). This manual provides important safety guidelines for the installation, maintenance, and use of the modules. To ensure correct installation and stable power output, it is necessary to read and understand all installation instructions before proceeding.

Can a PV module be switched off?

PV modules produce electricity when exposed to daylight and individual modules cannot be switched off. Hence, unlike most other electrical installation work, the electrical installation of a PV system typically involves working on a live system. See requirements of Regulation 14 of Electricity at Work Regulations 1989.

Can a photovoltaic module be installed outside?

Photovoltaic modules are designed for outdoor use. Modules may be mounted on ground, rooftops, vehicles or boats. Proper design of support structures is the responsibility of the system designers or installers. Mounting holes or clamp range and numbers suggested in this manual shall be used.

Can PV modules be connected in series?

PV modules connected in series shall have similar current, (please contact JinkoSolar if there is any concern), and modules must not be connected together to create a voltage higher than the permitted system voltage stated in the label of the module.

How many modules can be connected at a PV installation?

The number of modules that can be connected at a PV installation shall be determined by a qualified institution or person in accordance with the design specifications of the photovoltaic system and the local electrical design

specifications.

Who should install solar photovoltaic systems?

Installing solar photovoltaic systems require specialized skills and knowledge. Installation should be performed only by qualified persons. Installers should assume the risk of all injuries that might occur during installation, such as electric shock.
