

Photovoltaic Panel Administrator Contract

Overview

What is a solar PV power purchase agreement (PPA)?

A solar PV power purchase agreement or PPA offers immediate bottom line savings and carbon emission reductions for no upfront cost. Get a free quote.

What is a PV installation agreement?

The Installation Agreement is a lump-sum agreement between the project company, as owner of the project, and the installation contractor, the contractor that will be responsible for installing the PV system, providing the balance of plant and commissioning the plant.

How long is a solar PPA contract?

The term of a solar PPA is typically 25 years. The developer is responsible for the operation and maintenance of the system for the duration of the agreement. At the end of the PPA contract term, a customer may be able to extend the PPA, have the developer remove the system or choose to buy the system from the developer.

What is a solar PV PPA & how does it work?

A PPA offers an effective means to reaping the benefits of solar PV without having to take on the responsibilities of being a solar system owner-operator. A PPA also satisfies companies that prefer to reinvest their funds into core businesses activities.

What happens when a solar PV contract ends?

When the contracts come to an end the customer can choose to remove the system, extend the PPA or purchase the energy system. On-site solar PV generation can take the form of either a large-scale rooftop installation on a commercial or industrial (C&I) site, or a ground-mount installation on adjacent land.

Should you buy or rent a solar PV system?

You rent your roof and buy the discounted solar electricity rather than investing in a solar PV system of your own. A PPA offers an effective means to reaping the benefits of solar PV without having to take on the responsibilities of being a solar system owner-operator.
