

Photovoltaic fire extinguisher bracket

Overview

Can PV systems be used to fight fires in the UK?

Notwithstanding these regimes for installers and products, there is currently no national UK guidance specific to fighting fires involving PV systems, despite PV systems presenting new risks to firefighters, especially from the risk of electric shock and electrocution.

How far should a fire extinguisher be from a PV system?

For a PV system with maximum voltages of up to 1.5 kV, the VDE 0132:2008 recommends a minimal safety distance of 1 m if extinguishing the fire with a water spray jet and 5 m if using a full water jet. In Austria for example, similar safety distances are recommended in official training documents for firefighters.

Are photovoltaic power systems linked to fire?

Bookmark not defined. Over the past few years, there have been a number of media reports linking photovoltaic power systems (PV) with fire. With the prevalence of PV systems now in the UK, an increase in incident reports is to be expected.

How many fires are involving PV systems in the UK?

According to this report (BRE 2017a), 58 fire incidents involving building related PV systems were reported since 2010 compared to a total of around 1 million PV systems installed in the UK. This is equivalent to 0.0058% of all installed PV systems in the UK.

What are rc62 recommendations for fire safety with PV panels?

Alongside the above standards, the FPA has recently published RC62 Recommendations for fire safety with PV panel installations. Developed as a Joint Code of Practice by RISC Authority and the MCS, with the support of Solar Energy UK, the primary focus of this document is the prevention and

mitigation of fires involving PV systems.

How can a PV system improve firefighters' safety?

As main activities to improve firefighters' safety, the German guidelines explain the importance of recognizing PV systems, installation methods of DC wires to lower electric shock risks for firefighters, and a specific firefighting operation flow for fires involving PV systems.
