What is solarfox® display?

Solarfox® displays visualise solar power. Solarfox® displays present the performance data of photovoltaic systems in a unique way. Function and output data of a solar power system are explained by Solarfox in an illustrated way and become a special experience for the viewer. Make solar power visible to the public.

Are Siebert digital displays suitable for photovoltaic systems?

Siebert digital displays are suitable for any photovoltaic system and can also be connected subsequently to existing systems. The following connections are available as standard: The latest LED technology is used in Siebert digital displays. LED displays distinguish themselves through their high luminous power and durability.

What is a Siebert digital display?

With Siebert digital displays you make your solar system and its performance visible - in the foyer, in the entrance hall or public appeal outdoors, and you have the efficiency of your solar system at a glance. Siebert digital displays are suitable for any photovoltaic system and can also be connected subsequently to existing systems.

How can a public solar display benefit a business?

Public solar displays complementing well-known solar monitoring systems for photovoltaic plants and facilities. Do business profitably without exploiting humans or nature. The aim of harmonising economy, ecology and social responsibility is not an end in itself to many companies, but part of a commercial calculus.

What display solutions does Siebert solar offer?

Siebert Solar's wide range of display solutions offer a variety of SMD LCD

configurations, colours and sizes. Customised facias are available to show client or installer-specific images or logos.

How do I design a PV system?

Sunny Design makes designing PV systems very convenient. Simply open Sunny Design in your web browser or on your iPad or Android tablet and enter all the required information. The ideal system configuration will be available within just a few minutes.
