

Photovoltaic open innovation ecological alliance

Overview

The 600W+ Photovoltaic Open Innovation Ecological Alliance was announced today - a formation of 39 firms that aims to create a new collaborative and innovative ecosystem through open collaboration, synergizing the main resources of the industry chain and integrating core processes such as R&D, manufacturing and applications. What is a 700 W+ photovoltaic open innovation Ecological Alliance?

From pv magazine USA Trina Solar has announced the formation of the 700 W+ Photovoltaic Open Innovation Ecological Alliance. The group - which also includes Astronergy, Canadian Solar, Risen Energy, TCL Zhonghuan and Tongwei - plans to standardize the design of solar modules above 700 W in size.

What is Trina Solar's Solar Alliance?

The alliance is an upgrade to the 600W+ Photovoltaic Open Innovation Ecological Alliance, launched by Trina Solar in 2020. It aims to standardise the design and manufacture of 700W+ solar PV modules. This process will be instrumental in enhancing supply chain efficiency, boosting production and lowering costs of this module type.

How has the PV industry entered 600W+ era three years ago?

The companies said with the collaborative efforts of PV open innovation ecological alliance, the PV industry entered 600W+ era three years ago. Nowadays, power output of PV modules has been upgraded from 600W+ to 700W+ with the application of n- type high-efficiency cell technology (TOPCon, HJT, etc) and G12 (210mm) large-format wafer technology.

How has the PV industry changed over time?

The PV industry has come a long way in a short space of time, with the 600W+ era now making way for the 700W+ one. This has been driven by the rapid growth in ultra-high-power and ultra-high-efficiency modules, including n-type high-efficiency cell technology such as TOPCon and HJT, and 210mm

large-format wafer technology.
