

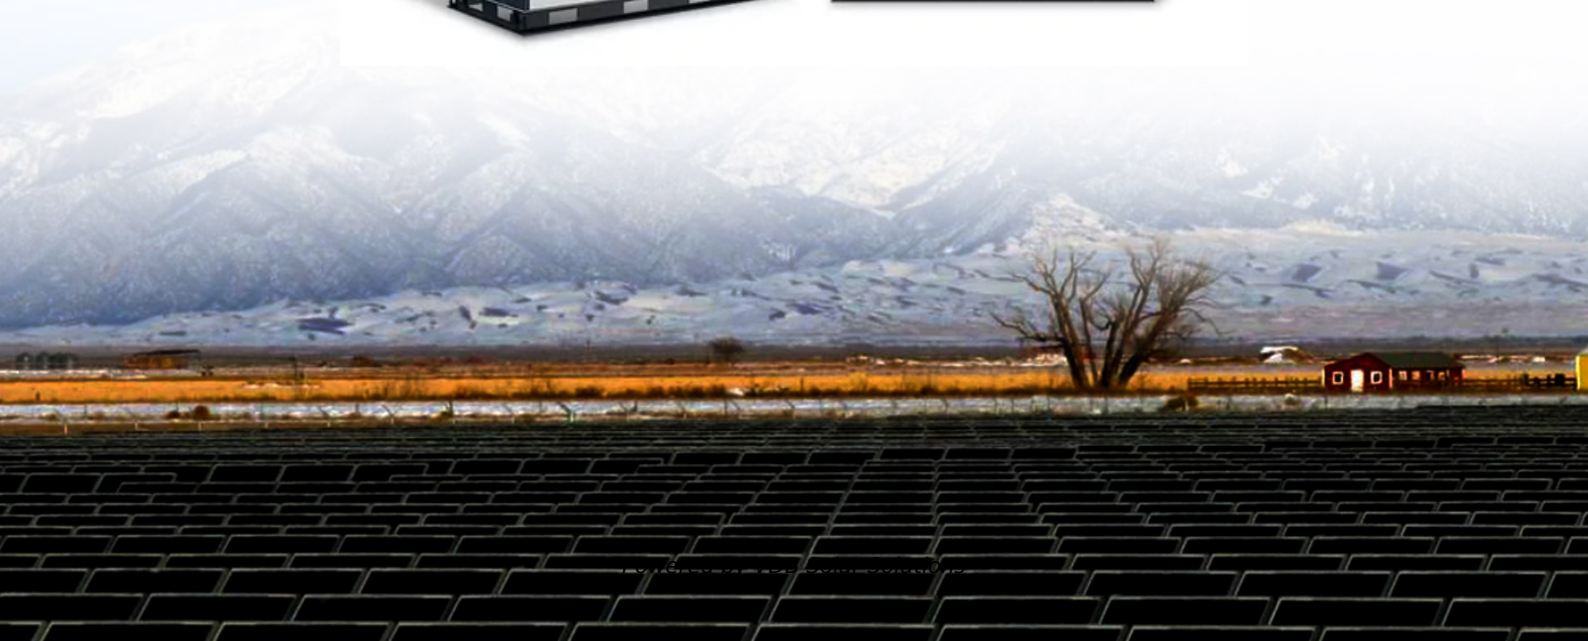

Photovoltaic panel 670w specifications

Overview

High-power bifacial module with dual PERC cells
Bifacial module with up to 670W capacity
210 mm wafer + 132/120 dual cells + PERC technology
Front-side power output of up to 670W
25.7% higher energy yield over its lifetime
What is a 670W PERC cell?

670W Ultra-high Power with 21.6% High Efficiency Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, the Vertex comes with several innovative design features allowing high power output of up to 670W. Excellent temperature coefficient and low irradiation performance brings the greater power.

How long does a vertex 670W module last?

Test results: The appearance of the Vertex 670W module remained intact after 20,000 cycles based on the standard load of 1,000 Pa, the power degradation was 0.1%. Test results: The number of failure cycles at 1500Pa is less than 1000Pa, but the Vertex 670W still showed excellent performance.

Who makes vertex N 610w solar panels?

Brian . The first Vertex N 610W module made at Trina Solar's plant in Huai'an rolled off the production line, marking the mass production of the 10GW n-type i-TOCon cell capacity and 10GW Vertex N 610W capacity. One of the best solarpanels in the world. The level of performance is very high. Products are robust and well finished.

Does 210 vertex 670W withstand a hurricane?

Test results: The number of failure cycles at 1500Pa is less than 1000Pa, but the Vertex 670W still showed excellent performance. Test results □ The 210 Vertex 670W module remains intact when wind speed reached 62.6m/s(225.4km/h or 140mph), which is equivalent to the low end of a Category 4 hurricane on the Sta r-Simpson scale.
