Overview

This table contains information on the cost per kW of solar PV installed by month.

The most common way to calculate the labour costs of a solar panel installation is to charge 20p per watt. So, for a 4kW system, you would pay 20p for 4000 watts, which comes to £800. How much does a solar panel cost?

For residential solar, the average cost of a 350-watt solar panel is between £150 and £300 (though this can vary depending on suppliers). As of 2024, a 4kW solar panel system costs anywhere between £6,000 and £8,000 for residential properties. This is based on 250-watt panels that cost approximately £400 – £500 per piece.

How much does a 4KW Solar System cost?

As of 2024, a 4kW solar panel system costs anywhere between £6,000 and £8,000 for residential properties. This is based on 250-watt panels that cost approximately £400 – £500 per piece. With savings of up to £729 a year from solar panels, you'll probably break even within ten years.

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. *kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.

How much does labour cost to install a solar panel?

Labour is added as a separate component to solar panel costs (UK). The labour pricing structure is calculated based on the number of installers needed times the number of days required to finish the job. For example, average labour costs range from £300 to £500 per person, per day. Complex or challenging roof layouts may increase labour costs.

How much do solar panels cost in the UK?

So, any investment you make on a solar project should be recouped relatively quickly. If you're looking for figures, you can expect around £31,386 per megawatt capacity installed. This can vary based on overall output and area, but it's a reasonable estimate to get you started. What is the Average Cost of Solar Panels in the UK for Homeowners?

.

How much do solar panels cost in 2022/23?

The cost of installing small-scale or domestic solar panels of up to 4kW increased by 26% in the 2022/23 financial year, exceeding a previous record high in 2014/15 by 14%. The median cost per kilowatt for a small solar panel installation exceeded £2,000 for the first time, an increase of 36% since 2021/22.
