

Photovoltaic panel installation requires a certificate

Overview

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Do I need an MCS certificate to install a solar panel?

According to Ofgem, your solar panel installation and installer must be suitably certified to be eligible, and you can provide an MCS certificate to demonstrate this. Such incentives allow you to offset the cost of the installation gradually. You can earn a quicker and maximum return on your investment and make solar energy more financially viable.

Why do I need a solar panel certificate?

This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point. Your installer should send you the certificate after they've commissioned your solar panel system. Can neighbours object to solar panels?

.

What are the requirements for a solar PV installation company?

Competency criteria: The installation company needs to prove they have skilled employees who meet the MCS 025 Standard. This involves identifying a Nominated Technical Person (NTP) who has completed an MCS approved training course for solar PV technology.

Do you need a 'suitable certification' to install solar?

Ofgem states that anyone installing solar PV, wind, and micro-CHP installations up to 50 kW needs to demonstrate that the installation and installer are 'suitably certified'. It also states:.

Do solar panels need a Microgeneration Certification Scheme (MCS) certificate?

Although it's not strictly required for your solar panels to have a Microgeneration Certification Scheme (MCS) certificate, it's highly recommended. Government data shows the MCS has certified over a million installations since its launch in 2007 and has around 2,000 registered installers.
