Overview

What is a 'in roof' solar panel?

'In roof' solar panels are very similar to 'on roof' panels, the only real differences being that with in roof solar panels, the panels serve a dual purpose, acting both as the roof covering and as generators of electricity. Tiles are not required under an in roof system.

Are solar panels a good choice for a new roof?

In roof solar panels are the obvious choice when building a new property or when roof refurbishment works are being undertaken. The initial choice is whether to use a complete solar roof system or a system in which the solar takes up only a part of the roof.

Can solar panels be installed on a flat roof?

Get solar panels installed on your flat roof with a BauderSOLAR F system. The best, risk-free solar solution. Find out more or get in touch today.

Can a flat roof solar system be installed on a domestic property?

Whilst flat roof solar systems are more commonly used on commercial buildings, they can certainly be fitted onto domestic properties too. Read on to find out more about flat roof solar, and how in many cases it is actually better than normal on-roof solar! How do Solar Panel Systems on a Flat Roof Work?

.

What is a flat roof photovoltaic mounting system?

The flat roof photovoltaic mounting system is attached to the roof without penetration of the waterproofing system or roof deck. The systems are designed to be used in conjunction with our Single Ply or Reinforced Bitumen Membrane waterproofing solutions and are lightweight at 9-12.5 kg/m², depending on the module selected.

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.
