

Photovoltaic panels installed on top

Overview

On-roof solar, also known as a retrofit solar array, is when solar panels are fixed on top of the roof covering. Solar Installers remove tiles temporarily and fix brackets to the roof. How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage — this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m² of roof space. Don't forget to include at least 30 cm from the roof's edge.

How do I install a solar photovoltaic system?

The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year. The possibilities for mounting solar are endless.

Can you make a whole roof out of solar panels?

It is possible to create a whole roof out of solar panels using an in-roof system. Making the whole roof out of solar panels can be a fantastic option as installing solar panels is an asset to the home because of the savings in electricity and feed-in tariff payments. Why not consider making it your total roof covering?

.

Where should solar panels be installed?

The best position for a solar panel installation is on a south-facing section of your roof at a 30°-40° angle. Make sure to have a professional assess your roof to ensure that your integrated solar panels can be installed adequately for optimal performance.

How do I choose the best solar panel location?

Consider optimal solar panel placement: To maximise solar panel efficiency, you will need to consider angle and orientation. The best position for a solar panel installation is on a south-facing section of your roof at a 30°-40° angle.

Are integrated solar panels better than on-roof solar panels?

Whereas on-roof solar panels are known to be an eye sore, integrated solar panels are the modern-day solution. As the Solar panels sit in-roof, they appear more streamlined and blend in more seamlessly, making integrated solar panels the more attractive option. Furthermore, In-roof Solar Panels can even be retrofitted to modernise your home.
