

Photovoltaic phone case

Overview

What is a solar powered phone case?

Using the same technology that is used in normal solar panels, a solar powered phone case is basically a mini solar panel that is integrated to your phone case. Photovoltaic solar panels convert light energy into electrical energy, so that you can charge your phone with the solar powered case.

What are the best solar phone charger cases?

To help you make an informed decision, we've reviewed some of the best solar phone charger cases on the market: Blavor Qi Portable Solar Power Charger and 10,000mAh External Battery Pack, Kepswin Store 20000mAh Solar Power Bank, AMAES 24000mAh Portable Solar Power Bank, and ERRBBIC 20000mAh Waterproof Battery Backup Solar Panel Charger.

Should I buy a solar power phone case?

The solar power phone case is of course more useful in places where people have a fair amount of sunshine, however even if you are not outside during your day they can still be useful.

What is the best solar powered cell phone case?

Amazon's Choice for a solar powered cell phone case is the MINRISE Portable Charger 30000mAh, Power Bank Solar Charger with 2 USB Outputs and USB-C (Input Only). It is an external battery pack for outdoor activities and is compatible with cellphones.

Can a solar mobile charger be integrated into a protective case?

Our project's goal is to create an integrated solar mobile charger that can be seamlessly incorporated into the protective case of the mobile phone. The proposed design traps solar energy and stores it in a rechargeable battery. This system has the ability to serve dual role, both as a protective case and act as power backup for the mobile phone.

Can a solar phone case charge a 3030mah smartphone?

A solar phone case with a capacity of only 1500mAh will not be able to charge a 3030mAh smartphone in full. It's important that the solar phone case's power bank is at least twice as powerful as the smartphone battery to effectively charge it when needed.
