

# Photovoltaic solar bracket assembly diagram

## Overview

---

What is a power rail PV module mounting system?

The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.

Are solar stack roof mounting systems ul 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

How do I install a solar photovoltaic system?

Installing solar photovoltaic systems requires specialized skills and knowledge. Installation should only be performed by qualified personnel. Before installing a solar photovoltaic system, installers should familiarize themselves with its mechanical and electrical requirements.

Can a racking system be used to ground a PV module?

This racking system may be used to ground and/or mount a PV module complying with UL 1703 only when the specific module has been evaluated for grounding and/or mounting in compliance with the included instructions. The system is a non-separately derived system.

How to mount solar modules on a roof?

Mounting diagram There are various possibilities for the arrangement of the mounting system and the modules on the roof. The most common option is to horizontally assemble type TF50+ carrier rails and arrange solar modules vertically. For this reason, any further mounting procedures describe such an

arrangement.

What is the minimum wire size for a solar PV system?

JA Solar recommends installers use only sunlight resistant cables qualified for direct current (DC) wiring in PV systems. The minimum wire size should be 4mm<sup>2</sup>. Rating Required Minimum Field Wiring Cables should be fixed to the mounting structure in such a way that mechanical damage of the cable and/or the modules is avoided.
