

# Photovoltaic solar panel installation master

## Overview

---

The qualification covers a range of topics, including safety considerations for working with electrical systems, components of photovoltaic systems, principles of photovoltaic power generation and the practical skills needed to install and maintain small scale systems. Upon successful completion of the qualification.

To undertake this course, you should fit the following entry requirements: 1. Be an experienced electrician. 2. Hold a valid level 3 certification in the BS7671:2018 Requirements for Electrical Installations (18th edition). 3. Hold a.

A practical observed assignment and one online assessment with multiple choice and multiple response questions are used for assessment. The examinations are open-book and based on.
