## Overview

---

What is a solar walkway?

Our Solar Walkway is a smart data floor designed to promote renewable energy in the public domain. The floor is installed in urban environments to make the production of renewable energy visible. Everyday citizens can directly contribute to the energy transition by engaging with the Solar Walkway and benefit from its data and energy production.

What is a walkable solar PV pavement?

Another innovative technology is the walkable solar PV pavement developed by Spanish tech company Onyx Solar . Such PV floor can comply with the anti-slip regulation and support 400 kg in point load tests.

Can walkable photovoltaic floor tiles be used for pavement?

The paper Development of walkable photovoltaic floor tiles used for pavement, published in Energy Conversion and Management, describes the walkable PV floor tile as similar to a 500mm<sup>2</sup> pavement surface with a depth of around 20mm. 15% efficiency.

How much energy does a walkway solar panel generate?

The panels have an efficiency rating of two-thirds of regular PV panels. They generate up to 35Wp. Each module is 60 x 60 cm. The energy generated is sent back into the grid. 9 sensors on every Walkway module make the floor a powerful touchpad with endless possibilities.

Can a walkable solar PV floor be installed on a green deck?

To explore more possible areas for solar power generation, the walkable solar PV floor tile is proposed for installation on pavements and cycling tracks, which receive a lot of sunshine every day. The feasibility and potential area of applying this innovative PV floor on the green deck was investigated.

What are walkable solar panels?

The walkable solar panels are an extension of the public sidewalk between Exploration and Innovation Halls at the intersection of GW Boulevard and University Drive. “GW is proud to announce that the Solar Walk includes the first installation of a walkable solar-paneled sidewalk in the world,” said Selbst.
