

Pigeons under solar panels uk

Overview

One of the most effective and humane methods to deter pigeons from nesting under your solar panels is the installation of bird mesh. Bird mesh, or solar panel mesh, is a durable and non-intrusive barrier that prevents pigeons and other birds from accessing the area beneath your solar panels. Do pigeons nest under solar panels?

Pigeons nesting under solar panels can pose significant risks to both the performance and safety of your solar energy system. One of the primary concerns is reduced performance, as pigeons and their nesting materials can block sunlight from reaching the panels, leading to decreased energy output and efficiency.

Are pigeons nesting under solar panels in Nottingham?

Pigeons nesting under solar panels have landed Nottingham City Council with a bill of more than £350,000. The authority has already fitted thousands of panels to tenants' homes as part of its efforts to be a carbon-neutral city by 2028.

How much does it cost to remove pigeons from solar panels?

It typically costs £550-£750 to remove pigeons from solar panels, if you also want to stop pigeons from making nests under your array ever again. The person installing anti-pigeon measures can temporarily remove your pigeons by approaching them and making loud noises.

How do I deter pigeons from using my solar panels?

Prokill has two methods available to deter pigeons from using your solar panels as a nest location. We can install mesh around the solar panels or Probird Solar Guards. Both methods are proven to deter pigeons from these locations. Please feel free to contact Prokill today for expert advice and a free survey.

Are solar panels good for pigeons?

Unfortunately, it's not just humans who are benefiting from this however. Pigeons have discovered that solar panels provide the ideal nest location as the panels provide protection against the elements.

Are pigeon droppings bad for solar panels?

Bird droppings decrease solar panel efficiency. Pigeon droppings are among the key types of dirt that accumulate on solar panels and stop the light getting through. This is a particular issue for PV systems with string (central) inverters, because pigeon droppings on just one panel will degrade the performance of all the panels.

Pigeons under solar panels uk

Why is it Important to Pigeon Proof Your Solar Panels

Solar panels are a great addition to any home or business, looking to lower their carbon footprint and reduce their energy bills. Nevertheless, they do come with some potential noisy neighbours. Solar Panels form a perfect warm and safe space for birds, in particular pigeons to nest under.
