

Real photos of solar power generation

Overview

In 2021, Hegen traveled through the United States, France, and Spain to photograph vast solar energy infrastructures that will be delivering clean energy for generations to come. The photos were shot from a helicopter. “In a single hour, the amount of power from the sun that strikes the Earth is more than the entire world.

The neatly-arranged circular facilities seen in Hegen’s images are solar thermal power plants, which focus sunlight from thousands of moving mirrors called heliostats onto a central collector tower. While earlier designs of.

“Aerial photography, to me, is like data visualization for scientists,” Hegen says in a 2022 interview with Fortune. “The elevated perspective has.

Where can I find solar energy stock photos?

You can find more than 180000 solar energy stock photos at the iStock image library. Search our collection for stock imagery of solar energy tech such as solar panels and solar thermal collectors and aerial shots of solar farms around the world.

Is photovoltaic energy on the rise?

Although the total percentage of global power needs met by photovoltaic energy alone remains small, at about 6 percent, it is on the rise. Governments and large companies are building massive facilities to provide both solar thermal and photovoltaic energy, converting the sun's energy into electricity for millions of homes and businesses.

What is the solar power series?

The project is titled The Solar Power Series. Hegen is a German photographer who has focused his career on capturing aerial photos that offer insights into the traces humans are leaving on Earth's surface. Hegen "provides an overview of places where we extract, refine and consume resources," his website reads.
