

Real scale solar system ksp

Overview

Does KSp have a real Solar System?

Changes KSP's solar system to make it like the real one. - Releases · NathanKell/RealSolarSystem.

What is a small scale solar system?

Small Scale Solarsystem (1/10th, i.e. Kerbin-scale, real solar system) KScale2 (2x Kerbin) Kerbin 365 (3.2x planets, 6.4x orbital distances) 64K (6.4x Kerbin) 10x Kerbol system README: This mod will convert the Kerbol System into the (Real) Solar System.

What is real Solar System?

(Almost) Real Solar System is kerbalized version of Real Solar System. It keeps the stock planets but changes them to be more realistic. The orbits and sizes of planets have been changed to be in the same ratios as our solar system. Some planets have been moved around to fill in some gaps, and names of some planets have been changed as well.

Is RSS a good mod for KSP?

RSS was literally just released for KSP 1.3.1. Be patient! On 4/3/2018 at 9:23 AM, Ninadragonborn said: this is good is there support for v1.4 i can't play KSP without RSS it feel unrealistic without this mod you know it's stuff like this that makes me NOT want to update the stuff ever.

What is real Solar System reborn?

Real Solar System: Reborn is a mod currently developed by ballisticfox, with frequent contributions from Charon_S, VaNnadin and Techo. RSS: Reborn intends to represent the bleeding edge of Kerbal Space Program, with never before seen terrain detail and support for blackrack's latest Volumetric Cloud developments and Parallax scatters.

How do I reinstall KSP RP-1?

The best option would be to create a completely fresh install of KSP, and then use CKAN to select the RP-1 Express Install. Alternately (but more complicated), would be to use CKAN to uninstall the RP-1 Express Install and then reinstall through CKAN. Make sure to select RP-1 rather than RP-1 (Legacy) when prompted.

Real scale solar system ksp

Stock KSP to Real solar system / Realism overhaul

Introduction Hello all! This is going to be a super long post. There's a TL;DR, but if you're truly interested in RSS the full guide should hopefully be useful. Some of you may be aware of the mod Real solar system, which changes the Kerbin system to our own, and its companion mod Realism overhaul which makes the game more realistic in a variety of ways.

[WIP] Real Scale Boosters

NOTE: Discussion has moved [HERE](#). Real Scale Boosters Note: This pack is intended for use with "Real Solar System", or otherwise a more realistic scale version of Kerbin. The parts included will likely be severe overkill in a more normal KSP installation. Introduction: This is really early in deve

[Real Solar System Expansion \(RSSExpansion\)](#)

Real Solar System Expansion (RSSExpansion) is an add-on for Real Solar System, adding multiple new planetary bodies to the Real Solar System (RSS) modification. New bodies include: Various asteroids and comets (67P, Bennu, Chariklo, ...

**Real Solar System for KSP 2 :
r/RealSolarSystem**

Seconded, I think Real Solar System + Real Exoplanets already does this, and I don't see any reason why they couldn't be implemented in KSP 2. I wouldn't imagine that the developers would do it though, since the Kerbol system is very much the game's

6 ???· Kerbin Size Real Solar System. Contribute to KerbalFrench/KSRSS development by creating an account on GitHub. Configs for FAR, KEX-Footprints, Sigma Binary, Distant Object Enhancement, CRP, PlanetShine and KSC-Switcher are included in KSRSS. KK

What size/scale ratio is KSP vs real life? : r/KerbalSpaceProgram

The solar system and parts use different scales. Planets are roughly 1/10 size and Stock parts are roughly 5/8 scale. The parts rescale is only an average though and isn't linear. Smaller parts scale slightly bigger than 5/8 and larger parts scale slightly smaller.
