

Refusol solar inverter datasheet

Overview

What is a REFUsol 20K inverter?

The innovative REFUsol 20K inverter offers a modern solution for commercial and industrial PV systems. With its 2 MPP trackers, it enables flexible adaption to different system designs and individual requirements. Its compact design and high power density per weight make it extremely versatile, whether on roofs or in ground-mounted systems.

What is a REFUsol 48k-ul inverter?

The REFUsol 48K-UL inverter, also referred to in these operating instructions as the inverter, is a solar inverter, which transforms the direct current generated by the PV generator (photovoltaic modules) into alternating current and feeds this to the public power supply network.

What is REFUsol 20K?

Max. Efficiency up to 98.6 % The innovative REFUsol 20K inverter offers a modern solution for commercial and industrial PV systems. With its 2 MPP trackers, it enables flexible adaption to different system designs and individual requirements.

Why should you choose REFUsol inverter?

Maintenance-free: The natural convection cooling virtually eliminates periodic maintenance needs, reducing your lifetime costs! Max. DC voltage (V) Each REFUsol inverter has an integrated data logger and can be connected to a local network or the Internet quickly and easily via plug&play.

Do REFUsol solar inverters have a grid protection relay?

REFUsol solar inverters have an internal grid protection relay and section switch. Depending on local connection, installation instructions and the selected line voltage level either the internal grid protection relay can be used with section switch, or an external grid protection relay must be used with

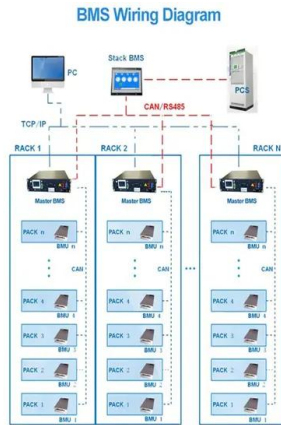

section switch also.

How do I view a data logger on a REFUsol solar inverter?

Alternatively, you can also wire the jumper to the intermediate terminal point (cable extension). The actual values of the sensor can be viewed in Actual values > Sensor. The data continues to be recorded with the data logger and can be viewed via REFUlog. REFUsol solar inverters have an internal grid protection relay and section switch.
