

Rise solar company california

Overview

Is RISE Solar a good company?

The speaker has worked with many solar companies and considers RISE Solar to be the top one. They have installed two solar arrays from RISE Solar at their current home, with a total capacity of 25KW, making their home net energy neutral or even slightly positive.

Is California the king of solar energy?

In solar energy, California is the king of all states and has been for quite some time. No American state has maintained such a consistent commitment to solar power or come closer to meeting its stated goals in the renewable energy sector.

Who is the best solar installer in California?

From 2020 through 2022, Solar Optimum was named the top solar installer in the state of California by both Solar Power World and Panasonic. Solar Optimum standout features include: #1 Good quality solar panels: Superior solar panels installed by experts with extensive experience.

How has California benefited from solar energy?

At the municipal and state levels support for solar initiatives and incentives has remained strong, and this along with California's warm days and naturally sunny skies has helped solar energy prosper. California currently gets about one-third of the state's electricity from renewable energy sources .

What is RISE power?

RISE power is a fully licensed installer with over 15 years of combined experience in the solar industry. It was formed by founders who knew there was a better way to provide more value to customers by using the highest quality products tailored to the custom needs of your home. Loading.

How much does solar cost in California?

The average price of solar is about \$2.14 to \$3.22 per watt in California, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.
