

# Sentinel power systems

## Overview

---

How much power does a Sentinel rectifier system produce?

The Sentinel Rectifier System can hold three rectifier modules and have a maximum power output of 1.8kW, producing a maximum current output of 33.3A at 54Vdc. The system is intended to be a complete power system in a box, so no connections need to be made internally.

How do I connect my Sentinel power system to the sm3x?

You may have received a CD with your Sentinel Power System. This contains the user manuals relevant to the System you have purchased, plus the SM3x Configuration Software. This software enables direct communication from your computer to the SM3x via the USB port.

What is a power system?

5.1. Power System The system is designed to be extremely simple to install and set up. The following is a summary of the system: Battery Low Voltage Disconnect fitted as standard (80A rating). Up to 2\*x 30A Battery Circuit Breaker, this may be specified as different values at time of order.
