

SimCity 5 Solar Power Plant

Overview

What is a solar power plant in SimCity?

The Solar Power Plant is a power plant building seen in the SimCity series. On cloudy days, the solar power plant will provide little to no power at all. On sunny days however, it is a clean and relatively cheap way to get power. The solar power plant is similar to the one on SimCity 2000, but isn't at the whim of the weather.

How many solar arrays are there in SimCity?

Each solar power plant can have a maximum of 16 total solar arrays. The solar power plant is the only ploppable power plant in Simcity that does not lower land value, so it can be placed anywhere in the city. If there are any high density buildings in the city, each Concentrated Solar Array will produce 30MW (7.5 MW less).

How many types of power plants are there in SimCity BuildIt?

In SimCity BuildIt, there are eight types of power plants available for building. Power is delivered from power plants connected to roads to provide service. Demolishing any building will return half the cost. Community content is available under CC-BY-SA unless otherwise noted.
