

# Small battery recycling

## Overview

---

### Can batteries be recycled?

Given the costs of making batteries, recycling battery materials can make sense. From the estimated 500,000 tons of batteries which could be recycled from global production in 2019, 15,000 tons of aluminum, 35,000 tons of phosphorus, 45,000 tons of copper, 60,000 tons of cobalt, 75,000 tons of lithium, and 90,000 tons of iron could be recovered.

### Where can I recycle batteries?

To find your nearest battery recycling location, use our recycling search tool. Standard alkaline batteries such as AAA, AA, 9-Volt, D, and C can usually be recycled at Batteries+ Bulbs stores. They usually charge a small fee. All Batteries+ Bulbs stores are franchise-owned and may have different recycling offerings. Check with your local store.

### Where can I recycle a single-use battery?

Check with your local municipality, waste hauler, and local solid waste district to see if they collect single-use batteries for recycling or if they accept batteries during household hazardous waste collection days. Some local hardware stores will also accept single-use batteries for recycling, but it is not always free.

### What is rechargeable battery recycling?

The best solution is to recover the valuable materials from the batteries and recycle them for use in other products, such as magnetic alloy and stainless steel. Launched in April 2005, the Rechargeable Battery Recycling Programme (RBRP) is the first voluntary Producer Responsibility Scheme in Hong Kong.

### How much does it cost to recycle a battery?

The WeRecycle Battery Box, which range in price from \$44.95 to \$115.95, is another solution for recycling a large amount of batteries. Call2Recycle, a

nonprofit that leads rechargeable battery recycling programs recently started offering mail-in single-use battery recycling that cost between \$68 and \$3,80 for an entire pallet of used batteries.

Can lithium-ion batteries be recycled?

A Critical Review of Lithium-Ion Battery Recycling Processes from a Circular Economy Perspective. Batteries 2019, 5 (4), 68, DOI: 10.3390/batteries5040068 Lv, W.; Wang, Z.; Cao, H.; Sun, Y.; Zhang, Y.; Sun, Z. A Critical Review and Analysis on the Recycling of Spent Lithium-Ion Batteries.
