

# Small pure sine inverter for 100w solar

## Overview

---

The sunlight hours will vary depending on your location, season and solar panel efficiency. If you live in the Midwest you will get more sun hours compared to someone who is the Pacific.

Inverters are almost always mentioned alongside solar panels so that some people may think they are essential. However there are instances wherein you may not even need one.

If you want to build a solar array you need more than 100 watts. Fortunately you can connect several of these to gain more power. But make sure the inverter has enough capacity.

The following tips are for 100W solar panels, but many of them also apply to larger PV modules. Always keep these in mind before you buy and install an inverter. 1. The inverter will

Calculating inverter sizes is the same no matter what the solar panel output is. Before you can figure out what inverter capacity to use, you must know how many watts a day your solar panel produces. Suppose you have a 12V 100W solar panel and your location receives 6 hours of sunlight. Your 100W solar panel.
