Overview

Sol-Ark currently sells three models of inverter, with names that correspond to the number of kilowatts (kW) of continuous power output. They are called the 5K, 8K, and 12K lines. Sol-Ark plans to begin selling a 15 kW inverter (called the “15K” of course) later in 2022. All of Sol-Ark’s inverters come with some important.

In addition to these common features, each model line offers its own functionality, warranty, and set of options, and comes at its own MSRP. Here’s a table showing the models and their differences. Table 1. Sol-Ark inverter models, compared *The Sol-Ark 8K comes standard.

Sol-Ark inverters have a well-deserved reputation for being flexible, functional inverters that are easy to use, install, and troubleshoot. They’re designed and assembled in the USA, with the engineering team ready to assist both installation professionals.

Are Sol-Ark inverters a good choice for a home solar installation?

If you’re researching equipment for a home solar installation, you may have come across Sol-Ark inverters. Sol-Ark is a well-known and highly-regarded brand that has a reputation for making excellent all-in-one hybrid inverters.

Which solar inverter is best?

Each inverter can accept more PV power than its rated power output, and can be connected to virtually any battery on the market. The Sol-Ark 5K inverter is best for small off-grid setups, the 8K inverter is likely the best choice for a residential on-grid installation, and the 12K is the best option for a full-sized off-grid home setup.

What is a Sol-Ark 15K solar hybrid inverter?

Sol-Ark 15K solar hybrid inverter is an off-grid, pre-wired inverter option that is designed for optimum energy efficiency and ease of use. It is also compatible with many different batteries, power sources, and other implements, making it a compelling option for anyone wanting off-grid power with minimal fuss.

What is the smallest solar inverter?

The 5K is Sol-Ark's smallest inverter, and is mainly meant for small off-grid applications. It supports up to 6,500W of DC solar input (3,250 for each of its MPPT charge controllers), and up to 9,600W of AC input from microinverters or a separate solar string inverter. It also allows for a backup generator to charge the battery bank.

How long does a Sol-Ark inverter last?

The Sol-Ark company has been working to master the technology behind off-grid power, and this shows in the construction of the inverter. Everything is made of quality materials, and it has been tested to have a lifespan of well over 10 years.
