

Sola power supply cad drawings

Overview

What is a Sola SDN-C DIN rail power supply?

The Sola SDN-C DIN rail power supplies are the next generation of the popular SDN series. These models combine high efficiency and compact size with new visual diagnostic LEDs to offer the most performance available from Sola/Hevi-Duty.

Do you need a solahd power supply?

If it needs power, it needs SolaHD. Systems that depend on sophisticated electronics can rely on SolaHD's performance, core and essential power supplies. Available in a wide variety of voltage combinations and volt-ampere capacities to meet your specific requirements.

Which power supplies can be used with solahd redundancy modules?

Parallel operation, extensive LED diagnostics, and universal AC or DC input voltage simplify installation and maintenance. For added reliability, the SDN-C power supplies can be used with the SolaHD Redundancy modules to provide redundant power supply operation.

Why should you use solahd power conversion & power quality products?

Anywhere in your facility, SolaHD powers your machine and process control applications with our power conversion and power quality products. Ensure Reliable Operations in Demanding Environments Power quality problems can disrupt production, damage equipment and corrupt valuable data.

Are there product manuals available for discontinued solahd products?

Product manuals are available for discontinued SolaHD products. The SVL Series provides the essential features needed for high volume applications where the power supply will be installed in a controlled environment. IP67 SCP-X power supplies eliminate the need for a separate enclosure.

Can SDN-C power supplies be used with solahd redundancy modules?

For added reliability, the SDN-C power supplies can be used with the SolaHD Redundancy modules to provide redundant power supply operation. Extensive international hazardous location certifications, including Class I, Zone 2, ATEX, IECEx, ExEAC. Hazardous location temperature code (T-Code) rating of T4. IND. CONT. U 508, CSA C22.2 No. 107.1 EQ.
