

Solar 68

Overview

Is the P68 Pathfinder solar a reliable source of energy?

Explorers, adventurers, and outdoor enthusiasts recognize the sun as a reliable point of reference for navigation and as an inexhaustible source of energy. These are two principles applied in the new P68 Pathfinder Solar.

What is Sunguard SN 68?

SunGuard SN 68 double-silver coating invites in abundant light. It offers a 1.82 light-to-solar gain ratio on clear glass. Build bright, welcoming spaces while blocking unwanted heat to help earn LEED® credits and reduce operating costs. SunGuard SN 68 has strong color neutrality and is designed to offer a look close to the one of clear glass.

Why should you choose Sunguard SN 68 double glazed?

On a clear-over-clear double-glazed configuration, its superb 68% visible light transmission with only 11% reflectivity can help illuminate interiors, expand views, and connect indoors and out. SunGuard SN 68 double-silver coating invites in abundant light. It offers a 1.82 light-to-solar gain ratio on clear glass.

Global Solar Atlas

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

[Is it worth going solar in your 70's?](#)

For many homeowners, solar panels are a long-term investment in energy cost savings. On average, it takes between 7-10 years to break-even, leaving decades to accumulate savings. But what if you're not sure if you'll be in your home for 7-10 years? Going solar in
