Overview

Small Generation Installation (SGI) is an Installation that comprises one or more Low Voltage Power Generating Modules each with an Intrinsic Design Capacity of no more than 32 A and where the aggregate Registered Capacity of all the Power Generating Modules is no more than 60 A. The term Small Generation Installation.

To progress with your connection, you must contact an accredited installer (or equivalent) to arrange your generation connection for you. They will usually contact us on your behalf (although you may do this yourself).

Once you have chosen your preferred type of generation, your generator will need to be connected to our network either through your existing.
