

Solar bracket light installation diagram

Overview

Solar street lights are designed to be essentially maintenance-free. However, in certain regions with extreme conditions, some level of maintenance is required to ensure the proper function of the lights. These regions are.

Congratulations, you've just installed your solar light! Remember, a more comprehensive manual is included inside of every solar light box.

How to install solar string lights?

Note: To disconnect the solar panel (4) Structural installation: To create a draping effect for the solar string lights attach the first bulb to a structure, then only mount every 3-4th bulb to create the desired effect. Complete the effect by from the mounting bracket, press mounting the last bulb to a structure.

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also, you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level, solid ground (we can accommodate if the soil isn't the most sturdy).

Where should a solar powered floodlight be installed?

Ideally the solar panel should be installed south facing and in the sun for as much of the day as possible. This guide will take you through what you need to do to fit your solar powered floodlight safely and securely. Before you start, have a look at the best place to install your solar-powered light.

How do I connect my solar light to my solar panel?

Point the remote control towards the black sensor on the underside of the solar panel and press Power. The remote control will power on and signal the Solar Light to receive information. If connection is successful, the LCD will show Read OK. Note: Direct sunlight can interfere with the transmission.

How to install a solar panel?

Open the junction box of solar panel. Fixed the cables□ Close the box□ Connect the solar panel and the controller, and put the wire into the pole through the T frame, and fixed the T frame to the pole tightly, and finish installation. Connect solar panel, lamp, battery and controller as the map shows, and then test the system.

How do I install a security light?

Place the bracket into position and screw it flush to the wall. Assemble the security light as required. Fit the light to the bracket and screw it securely on with the fixings provided. With the light securely attached to the wall, read the product fitting instructions and set the light up, adjusting the timer, sensor and solar panel as required.
