Overview

Solar companies offer different warranties on their products and services, but you can find some common themes among the most prominent companies.

In addition to picking the solar installation company that's best for you, you'll also need to do some research to help determine which type of solar panels will work best for you.

Knowing the median household size in Las Vegas, which is 1,867 square feet, and the average amount of energy each home uses in Nevada—959 kWh per household—can help you determine.

Determining the number of panels, or how big your solar system needs to be, is the next step in outfitting your home for solar energy. Consulting directly with the installation company will help you figure out exactly how many solar panels you need. But before your consultation, be sure to have this information on.

Solar companies offer different warranties on their products and services, but you can find some common themes among the most prominent companies. For example, most solar companies and.
