Are solar panels worth it in Arizona?

For many homeowners, going solar is worth it in Arizona for the reduction in energy bills and reliance on local power companies. Over 25 years, Arizona homeowners with solar panels can save about \$59,661 in total utility power costs. A typical residential solar panel installation usually pays for itself within 7 years in Arizona.

Is solar a good investment in Arizona?

The state averages seven to eight peak sunlight hours per day, maximizing the amount of power produced by your solar energy system. Ultimately, going solar is a worthwhile investment in most states, but particularly in Arizona. »
STILL NOT SURE?

.

Who is a commercial solar installation company?

Commercial solar installations on private businesses and public buildings. Serves all of Washington state and parts of Arizona, Idaho, New Mexico and

Oregon. Carries equipment from brands like ABB, Fronius, SMA and SunPower. Specializes in solar water heating system design, sales and installations. Founded in Arizona in 1984.

How much does a solar system cost in Arizona?

A typical Arizona household needs a system with a capacity of 9.2 kW to offset enough energy costs to make solar viable. Depending on your household energy usage, you might need a smaller or larger system. Most installers set the price according to the system's wattage, with a typical cost between \$2.50 and \$5 per watt.
