

Solar companies that offer ppa

Overview

What is a solar power purchase agreement (solar PPA)?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

What is a solar PPA?

A solar PPA is a type of arrangement in which the homeowner allows a company to install a solar system on the property. Instead of leasing or purchasing the system, the owner only pays for the power they use. PPAs range in length, but they can be as long as the lifetime of the panels on the home.

What are the best solar PPA providers?

(Note: these providers often offer both leases and PPAs. When doing your own research, make sure you are reading the information about PPAs!) SolarCity is perhaps the best known solar PPA provider, benefiting from its origins in the head of Elon Musk and acquisition by his electric car company, Tesla.

Is a solar PPA a good deal?

Making this a desirable deal for both the solar energy supplier and you. A PPA is a popular financing option for solar energy because it allows the homeowner to use solar energy without paying the hefty up-front cost of going solar. But don't be fooled by a "free solar panel" gimmick — solar PPAs aren't free, and they have their disadvantages.

What is a solar service provider (PPA)?

Solar Service Provider or Project Developer: Company developing PPA projects. It is in charge of finding customers, selling them the solar service,

arranging for the PV installation, caring for the system, and charging the consumer for the electricity consumed. It can also access the available federal and state solar incentives.

Why are solar PPAs so popular?

Solar PPAs are popular because they can be structured with minimal upfront capital costs to the business owner. With a solar power purchase agreement, the developer takes on the majority, if not all of the upfront costs associated with designing and constructing the solar system. In fact, most PPA customers will be cash flow positive on day one.
