

Solar developer

Overview

Who are the world's top solar developers?

Image: TotalEnergies The top ten utility-scale solar developers from across the globe accounted for 145GW of operational, under construction and contracted projects between July 2022 and June 2023, with French energy giant TotalEnergies being the top solar developer, according to research firm Mercom Capital Group's latest report.

What is a solar developer?

As the solar industry has grown in recent years, the term "solar developer" has grown in prominence. A solar developer, or project developer, is a company that guides a solar farm from an idea to reality (specifically, the point when it's ready for construction). Developers can range in scale from a few employees to thousands.

Which large-scale solar developers have the most operational capacity?

The top developer with the most operational large-scale solar capacity was TotalEnergies, with 12 GW. Enel Green Power was the second-largest player in terms of operational capacity with 9.2 GW, followed by Adani Green Energy with 7 GW. The top 10 large-scale solar developers accounted for 49.5 GW of operational projects globally.

Which company has the most solar power?

TotalEnergies was also the top company for under-construction and awarded (PPA-contracted) capacities, with 29.3 GW of projects. Brookfield Renewable Partners was the second-largest player, with 13.6 GW, followed by Adani Green Energy with 11.1 GW. The top developer with the most operational large-scale solar capacity was TotalEnergies, with 12 GW.

Where do solar projects come from?

Of the top 10 global solar developers, the Asia-Pacific (APAC) region made up

about 24% of developers' capacity; North America at about 18%; and Europe, the Middle East, and Africa (EMEA) at about 20%. Approximately 38% of projects were sited in Latin America.

How do solar developers find a customer?

Find a customer: Solar developers look for a customer interested in the electricity the farm will produce. This is either a utility, an electric cooperative (in rural areas), or an organization that wants the energy for its own use. The developer will negotiate a contract with the off-taker, which can take months by itself.

Solar developer

Understanding the Solar Project Development Process

Choose a solar developer with expertise in project development, engineering, procurement, and construction. OYA's in-house engineering and project management teams have successfully worked with numerous landowners to successfully develop ...
