Overview

Access the portal login page at monitoring.solaredge.com (or in any page of the SolarEdge website, click Monitoring Portal Login). Enter your user name (e-mail) and password.

The Site Details tab lists all the site parameters that can be entered when registering a site. You can

The Logical Layout tab in the Admin window displays the list of components in the site. This tab allows adding new inverters or Control & Communication Gateways (CCG).

Power optimizers are added to the logical layout automatically when the inverter starts to communicate with the monitoring server. When a power optimizer is paired to an inverter, the s

You can add, search for, and replace inverters/CCGs in the list of site components. The displayed windows are different for sites with SolarEdge inverters and sites with no.

A search box is available at the top of the device list, which enables filtering the list. Enter an inverter/CCG name or a serial number in the box. Click the Search icon to perform a search.

Access the portal login page at monitoring.solaredge.com (or in any page of the SolarEdge website, click Monitoring Portal Login). Enter your user name (e-mail) and password (as

The Logical Layout tab in the Admin window displays the list of components in the site. This tab allows adding new inverters or Control & Communication Gateways (CCG), and updating replaced components (inverters, power optimizers, CCGs and SMIs) in the.

The Site Details tab lists all the site parameters that can be entered when registering a site. You can change or add information at any time. If the site does not have a valid location or is not marked on the map, you must fill in a location on the map before making any.

Power optimizers are added to the logical layout automatically when the inverter starts to communicate with the monitoring server. When a power

optimizer is paired to an inverter, the server.

To configure your inverter communication: Log into mySolarEdge - contact your installer if you still need a Username/Password to access the Monitoring Platform. Tap the three bars icon at the top of the screen Tap " Inverter Communication " in the menu.How do I connect my inverter to the SolarEdge Monitoring portal?

Turn ON the AC to the inverter by turning on the circuit breaker on the distribution panel and turning on the AC/DC Safety Switch. Wait for the inverter to connect to the SolarEdge monitoring portal. This may take up to two minutes. S_OK: Indicates that the connection to the SolarEdge monitoring portal is successful.

How does a SolarEdge inverter work?

The SolarEdge inverter efficiently converts DC power from the modules into AC power that can be fed into the main AC service of the site and from there to the grid. The inverter also receives the monitoring data from each power optimizer and transmits it to a central server (the SolarEdge monitoring portal; requires Internet connection).

How do I open a SolarEdge monitoring account?

When opening an account for the monitoring platform, make sure you have a SolarEdge inverter serial number and the name of the distributor from whom it was purchased. 1. Access the SolarEdge login page at monitoring.solaredge.com, designer.solaredge.com or from the Login button at the top right corner of the SolarEdge website.

How do I know if my SolarEdge monitoring server connection is successful?

To confirm the connection is successful,click on "inverter communication" in the menu. Connect to the inverter and verify the status as S_OK. S_OK displayed here or in the Inverter Status menu means the communication to SolarEdge Monitoring Server is successful.

How do I connect my SolarEdge to my Wi-Fi?

Log into mySolarEdge - contact your installer if you still need a Username/Password to access the Monitoring Platform. Tap " Inverter

Communication " in the menu. Follow the app's instructions to connect to the inverter's WiFi (if you are not already connected). The status of your Wi-Fi connection should be 'disconnected'.

How do I change the grid voltage on my SolarEdge inverter?

If permitted by local authorities, use the SolarEdge Configuration Tool to change the settings. Grid Voltage is below the limit permitted in this country. Verify that the inverter is set to the correct country. Consult the grid operator. If permitted by local authorities, use the SolarEdge Configuration Tool to change the settings.
