

# Solar edge inverter status lights

## Overview

---

What the lights on your SolarEdge inverter mean  
If the blue light is on: Your inverter is communicating with the monitoring platform  
If the green light is on: Your system is producing.  
If the green light is flashing: Your system is connected to the grid but is not producing. This can happen if there is snow covering the system or at night.  
What do the lights on my SolarEdge inverter mean?

- Eagle Point Solar The multicolored lights on the SolarEdge inverter tell us different information about the production and communications on your array.

How do I know if my SolarEdge inverter is faulty?

Contact your installer. Connections to the inverter communication board. Turn the ON/OFF switch to ON to initiate production. RCD Sensor Error. Contact SolarEdge support. Contact SolarEdge support. Over voltage in DC input of the inverter. Check the strings' voltage. Verify that the inverter is set to the correct country.

How do I terminate a SolarEdge inverter?

Terminate the first and last SolarEdge device in the chain by switching a termination DIP-switch inside the inverter to ON (move the left switch up). The switch is located on the communication board and is marked SW2. Only the first and last SolarEdge devices in the chain should be terminated.

What does a red LED on a solar inverter mean?

Any combination of LEDs on condition that the blue LED is on. Any combination of LEDs on condition that the green LED is on. Any combination of LEDs on condition that the red LED is on. Your inverter has a switch and three colored LEDs that indicate information such as performance and errors. Learn what they mean. | SolarEdge US.

What do the three LEDs on my inverter mean?

Your inverter has a switch and three colored LEDs that indicate system information, such as errors or performance. The following tables detail the possible LED and switch combinations, and what they mean. Any combination of LEDs on condition that the blue LED is on. Any combination of LEDs on condition that the green LED is on.

What if my SolarEdge certification inverter is not working?

If the problem persists, contact SolarEdge Support. You can use the activation code that appears on the certification inverter label to activate the inverter in case of a script error or a missing activation card. 4.
