

Solar inverter market share 2018

Overview

What is the global PV inverter market size?

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030.

What is the market share of solar PV inverters in 2023?

According to the Solar Energy Industries Association (SEIA), prices for solar PV installations have fallen 43% over the last 10 years in California, U.S. Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023.

Which region has the largest solar PV inverter market share?

Asia Pacific is expected to account for the largest solar PV inverter market share, driven by the growing demand for renewable energy and the need for energy independence. The region is home to many developing countries, including China and India, where there is considerable growth in solar photovoltaic (PV) installations.

Why is solar PV inverter market development important?

Presently, solar PV inverters majorly find applications in the utilities and industrial sectors. Rising solar PV adoption, driven by improving cost competitiveness and energy transition policies, has been a significant factor for driving solar PV inverter market development.

How will the North America solar PV inverter market grow?

North America solar PV inverter market is also expected to grow at a fast pace during the forecast period as the United States is a significant market for various types of PV inverters. The region's growth is further driven by favourable government incentives, increasing awareness of clean energy, and declining solar panel costs.

Who has the largest PV inverter market shipments in 2022?

In 2022, Huawei had the largest PV inverter market shipments worldwide, accounting for some 29 percent of the market. Huawei was followed by Sungrow Power Supply and Ginlong Solis in the second and third position respectively, based on shipments.
