

Solar offers americans subscriptions energy

Overview

How will a community solar subscription benefit LIHEAP-eligible households?

Connecting LIHEAP-eligible households with community solar subscriptions will lower energy bills for families, increase access to clean energy among underserved communities, and increase equitable solar energy deployment, in support of President Biden's ambitious clean energy and Justice40 goals.

Are solar subscriptions a non-profit?

The people offering "solar subscriptions" are not running a non-profit/charity, they expect to turn a profit, and that profit comes directly out of the anticipated savings from the solar panels. There are two kinds of renters (for this discussion) - single-family home renters and multi-unit dwelling.

Is solar energy cheaper than a utility bill?

Solar energy is now cheaper than utility bill rates in many states. Community solar, which allows multiple customers to benefit from a shared solar energy system, provides a way for individuals who cannot access rooftop solar panels to save money on utility bills and access other benefits.

Can solar energy save you money?

Successfully enrolled participants could see meaningful electricity bill savings, in alignment with the National Community Solar Partnership goal of 20% household savings, equal to \$370 per household annually. Solar energy is now cheaper than utility bill rates in many states.

What happens if a community solar subscription is not available?

If community solar subscriptions are available, households can opt to enroll in a subscription. If they are not available, households can indicate interest and be added to a waitlist. Households can consent to sharing data securely through the Connector with subscription managers.

How will Biden's new solar program help low-income people?

The Biden administration announced new plans to help more Americans get connected to community solar programs, which can lower electricity bills for renters and low-income households that might not be able to install their own solar panels on their homes.
