

Solar panel backlash is here

Overview

The industry is already in a panic. A recent report by the Solar Energy Industries Association found that 83% of US companies surveyed that use or purchase solar panels are expecting cancellations or delays. Are solar projects ruining the land they're built on?

The information on Ralston's website is "extremely misleading and appears designed to be misinformation," says Meyers of Virginia Tech. That includes claims that solar projects ruin the land they're built on. With the right practices, companies can improve local ecosystems, Meyers says, and farming can continue alongside power plants.

Will a solar panel investigation cause the solar industry to collapse?

A recent report by the Solar Energy Industries Association found that 83% of US companies surveyed that use or purchase solar panels are expecting cancellations or delays. And some CEOs worry the investigation could cause the industry to collapse — not entirely surprising given how heavily the US relies on these countries for solar panel materials.

Could the US solar industry collapse?

And some CEOs worry the investigation could cause the industry to collapse — not entirely surprising given how heavily the US relies on these countries for solar panel materials. Indeed, about 80% of all solar panels installed in the US are imported from Cambodia, Malaysia, Thailand and Vietnam.

Is the US solar panel industry on the verge of collapsing?

Opinion: The US solar panel industry is on the verge of collapsing. Here's how to prevent it | CNN Business Opinion: The US solar panel industry is on the verge of collapsing. Here's how to prevent it.

Should solar panels be reverted from net metering?

A retreat from net metering makes solar-panel owners less like mini power

plants and more like doomsday preppers, perhaps filling the backup battery in the basement with electricity to get through a blackout but adding nothing to the country's clean-energy supply.

How did grassroots activists stop solar projects in Ralston?

Many grassroots activists today credit their success in stopping solar projects to Ralston. One of them is Kathy Webb. Webb says she learned that a company wanted to clear a forest for a solar plant near her home in Rowan County, N.C., days before local officials planned to vote.
