

Solar panel usb battery charger

Overview

What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

What is a solar charger?

A solar charger is a device that converts solar power using solar panels into an electric current suitable for charging devices, usually in the form of a USB power port conforming to USB power specifications. Solar chargers typically don't have any power storage of their own, but you can use the charger with a power bank of your choice.

What are the different types of solar chargers?

Solar chargers tend to fall into three styles: Power banks that have a solar panel attached, stand-alone solar panels for charging outdoors, and a few options that combine these two, pairing larger fold-out panels with a power bank.

How many solar chargers are there?

I called in 13 different solar chargers from nine different manufacturers for testing. The main criteria was that it be a portable panel that you can use to charge a small electronic device, like a smartphone or a tablet, without the need for a power bank as an intermediary.

How much does a solar battery charger weigh?

The petite BigBlue 14W Solar Battery Charger is the lightest in our ratings and weighs just under one pound, while the heftiest portable solar panel in our ratings, the Goal Zero Boulder 200 Briefcase 200W Solar Panel, weighs in at 42 pounds. Certain models come with handles and are designed to fold up

more efficiently.

How many amps can a solar charger charge?

It has two USB-A outputs that can each put out up to three amps, which is enough power to charge any USB device. Roughly the size of a notebook, this solar charger unfolds into three panels and has a zippered case that can easily hold two charging cables, a battery pack, and more.
