Because solar is affordable these days, sizing up a system for your home is not an exact science. The most popular residential system size in Australia has risen to 6.6kW system; the large.

Federal rebate for solarSignificant up-front incentives are available from the federal government. Technically speaking, this discount comes in the form of 'small-scale tech.

Solar power systems only produce electricity during sunlight hours, and how much electricity is generated depends on the intensity and duration of the sunshine. ACT residents can benefit from solar in two ways: 1. Solar self-consumption, means using the solar energy your panels produce during sunlight hours, allowing.

The average Canberran rooftop receives an annual average of about 4.8 hours of sun per day based on data from the Bureau of Meteorology.

Because solar is affordable these days, sizing up a system for your home is not an exact science. The most popular residential system size in Australia has risen to 6.6kW system; the larger the system, the less you'll pay per watt of capacity (\$/W) for.

Solar Choice regularly publishes articles with indicative pricing for PV systems in Australia's capital cities (including Canberra) in our Solar Choice Price Index. Based on the price index data from September 2022, we can see that in Canberra a typical 6kw.
