Overview

Does El Paso Electric still use solar?

Even so, El Paso Electric has initiated plans to shutter some of its aging natural gas power plant units and rely more on solar energy. Last month, EPE began receiving power from the new Buena Vista solar farm, a 120-megawatt, 900-acre sea of solar panels outside of Chaparral, New Mexico. It's the utility's biggest-ever solar facility.

How many solar panels does El Paso have?

It has nine other major solar plants on its grid in West Texas and southern New Mexico. The new, 150-megawatt plant, with about 340,000 solar panels, will produce enough power for about 75,000 El Paso homes. But 50MW of power will be reserved for EPE's new Texas Business Community Solar Program.
