

Solar power for garden shed

Overview

If you're trying to power your shed on the cheap, running an underground cable from your house to the outbuilding is the way to go. One hundred feet of 12/2 underground feeder (UF) cable costs less than \$100, but digging a trench is a lot of work. You'll need to rent a trencher or grab a shovel, and believe me, your back.

Sheds and solar power are a natural fit. Solar power is environmentally friendly, quiet and requires little maintenance once installed. Solar panels.

There are a few ways to convert energy from the sun into usable energy for your shed, but one of the easiest is to buy a solar kit. Sure, you can cobble together a solar system from individual parts, and that's a good option if you're looking to customize, or you want to.

Installing a solar kit is a DIY-able task, but make sure you follow the instructions that came with the kit. The manufacturer may have videos and how-tos to help, too. If you run into trouble, call a licensed electrician, and always check to see if your city requires a permit. The.
