

# Solar power generation in Brazil

## Overview

---

Solar energy has great potential in Brazil, with the country having one of the highest levels of insolation in the world at 4.25 to 6.5 sun hours/day. [4] As of 2019, Brazil generated nearly 45% of its energy, or 83% of its electricity, from renewable sources.

The total installed in Brazil was estimated at 48.2 GW at October 2024, which consists of about 20.2% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power.

In 2016, a factory capable of producing 400 MW of solar panels a year opened in São Paulo, owned by . A plan to build a solar panel factory in was announced by the Chinese manufacturer Chint in 2017.

• • • • • .

In 2021, a number of photovoltaic and financial solutions companies expanded their work in Brazil. Companies such as Absolar, Insole, , Alexandria, and Evolua Energia saw significant growth. In addition, traditional energy companies such as

Solar now accounts for 20.7% of Brazil's total power capacity, making it the country's second-largest energy source. Brazil added 13 GW of new PV capacity from January to October 2024. How many solar power systems are there in Brazil?

As of March 31, 2023, home and building owners have installed more than 1.8 million renewable distributed generation systems in Brazil, totaling about 19 gigawatts (GW) of capacity, the vast majority of which is solar, according to the Brazilian Electricity Regulatory Agency ( ANEEL ).

Does Brazil have solar energy?

Solar energy has great potential in Brazil, with the country having one of the highest levels of insolation in the world at 4.25 to 6.5 sun hours/day. As of 2019, Brazil generated nearly 45% of its energy, or 83% of its electricity, from renewable sources. For example, 60% of Brazil's electricity generation came from renewable hydropower.

When will solar power be installed in Brazil?

Data source: Brazilian Electricity Regulatory Agency (ANEEL) Note: 2023 data include systems installed through March 31, 2023. Brazil's growth in distributed generation capacity from renewable resources—especially solar—has increased rapidly since the country implemented net metering policies in 2012.

How many solar power systems will Brazil have in 2024?

Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest levels of insolation in the world at 4.25 to 6.5 sun hours/day. As of 2019, Brazil generated nearly 45% of its energy, or 83% of its electricity, from renewable sources.

How much solar energy does Brazil generate in 2022?

In 2022, solar energy generation in the South American country surpassed 30 terawatt-hours, almost doubling the amount generated on the previous year. Solar accounted for 4.4 percent of Brazil's electricity generation in 2022. Get notified via email when this statistic is updated.

What is the main source of electricity in Brazil?

More than 85% of Brazil's electricity is now generated from renewable sources, and photovoltaics have become the second largest source of electricity generation in Brazil, ranking second only to hydropower and surpassing wind in terms of installed power capacity.

## Solar power generation in Brazil

---

### **Brazil's Solar Energy Sector Surpasses 43 GW Milestone, Drives**

The solar energy sector in Brazil has achieved a new milestone, surpassing 43 GW of installed power, according to the Brazilian Photovoltaic Energy Association (Absolar). ...

### **São Paulo Leads Distributed Solar Generation in Brazil with Over ...**

The state of São Paulo has emerged as the leader in distributed solar generation (DG) in Brazil, boasting over 4 GW of installed power, which accounts for 14% of ...

### **Solar energy becomes the third largest source in Brazil**

Now, the installed power of solar energy in the country is only behind hydro and wind power, consolidating the Brazilian electricity matrix as clean and renewable. In Brazil, the ...

### **Heat wave affects solar power generation in Brazil**

A heat wave drove Brazil's power demand up to a record high of 102 GW last week. However, it also affected solar power generation and pushed PV module operating ...

### Brazil holds the key to Latin America's solar potential

Latin America is on the cusp of a critical developmental phase for its solar power generation sector that could see it leapfrog Southern Asia and North America to become the world's second largest

### Top five solar PV plants in operation in Brazil

Of the total global solar PV capacity, 2.78% is in Brazil. Listed below are the five largest active solar PV power plants by capacity in Brazil, according to GlobalData's power ...

### Centralized vs. distributed generation: the balance of Brazil's solar

Centralized generation of solar energy: Brazil. Since the end of 2022, Brazil has added 3 GW of solar installed capacity, to take it to a total of 27 GW of installed capacity. Most ...

## Brazil Solar Energy Market Size , Mordor Intelligence

The country expects to have 1.2 million solar power generation systems by 2024. With its net-meter policy and decreasing solar energy cost, Brazil's solar energy is anticipated to increase ...

### Solar power is booming in Brazil. Can it be a boom for ...

In 2023, the Brazilian government announced a new "growth acceleration" plan that included BRL 67 billion (USD 12.5 billion) to finance new renewable energy projects. More than half - BRL 41.5 billion - is earmarked ...

### [Country Analysis Brief: Brazil](#)

Electricity generation (terawatt-hours) 22.39 .  
96.18 : 26.81 . 14.70 : 362.82 . 139.69 : 662.60 .

### Global Solar Council , Brazil accelerates in solar PV energy and

Source: ABSOLAR/IRENA, 2023. Currently, the solar PV source is the second largest in the national electricity matrix, with 26 GW in operation in Brazil, responsible for more ...

## Renewable energy in the Brazilian energy matrix: the share of solar

Last year, Brazil registered a historical record in free-market power plants expansion, with more than 3 GW installed. And 75% of the plants implemented were wind and ...

## Solar energy generation in Brazil hits two records in June

Since the beginning of the year, the country's solar parks have broken a total of eight new records, six happened on the Northeast grid alone. In 2024, Brazil's total electricity ...

## Brazil introduces new rules for distributed generation, ...

Journalist, covers the energy sector in Brazil since 2012, focusing on renewable energy. At pv magazine since June 2021, she writes about business, policies and technologies for solar energy in

## Brazil's 2050 National Energy Plan: Up to 90 GW of Installed PV

In the "Expansion" scenario, demand for electricity through centralised generation will reach about 172,000 MW on average -equivalent to about 2.5 times the consumption recorded in 2015 ...

### Combining wind and solar energy sources: Potential for hybrid power ...

Wind and solar energy have stood out in recent years because of the growth of global installed capacity. This work aims to present wind and solar photovoltaic energy ...

### Solar

Brazil added almost 11 GW of solar PV capacity in 2022, doubling its 2021 growth. Deployment is expected to remain on this level in the medium term thanks to continuous demand for renewable energy from industry and ...

### Perspectives for Expansion of Concentrating Solar Power (CSP)

The world is moving towards a low-carbon economy through renewable energy sources. In this context, concentrating solar power (CSP) technologies can exploit the rich ...

### Brazil: solar power generation 2023 , Statista

3 ???· In 2023, solar energy generation in the South American country surpassed 50 terawatt hours, increasing by 40 percent in comparison with the previous year. Solar accounted for 4.4 percent of

## Brazil Installed Solar Capacity Touches 50 GW In 2024

1 ??· According to the National Electric Energy Agency of Brazil, the country combines solar self-generation (distributed generation) through small and medium stations installed on ...

### ENERGY PROFILE Brazil

calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided emissions from renewable power is calculated as renewable generation divided by fossil fuel generation ...

### Solar energy policy to boost Brazilian power sector

The solar energy deployment in large scale is important to the mitigation of climate change. The value of the research is twofold: estimations of the cost-effective potential ...

### Brazil set to widen lead as cleanest major power sector

Solar power accounted for 6.8% of Brazil's electricity generation in 2023, up from about 4.2% in 2022, according to Ember. higher solar output allowed Brazil's power producers to lift total

### Brazil's PV market is booming, with installed capacity ...

More than 85% of Brazil's electricity is now generated from renewable sources, and photovoltaics have become the second largest source of electricity generation in Brazil, ranking second only to hydropower and ...

### Brazilian power generation expands by 10,300 MW in 2023

Boosted by wind and solar energy, electricity generation in Brazil ended 2023 with an increase of 10,324.2 megawatts (MW), according to the National Electric Energy ...

### Perspectives for Expansion of Concentrating Solar Power (CSP)

The world is moving towards a low-carbon economy through renewable energy sources. In this context, concentrating solar power (CSP) technologies can exploit the rich ...

### Brazil's PV capacity surpasses 38 GW

Brazil's total installed solar capacity has surpassed 38 GW, including large plants and self-generation systems on rooftops, facades, and small plots of land, representing 16.8% ...

### [Largest solar power stations in Brazil](#)

Solar power in Brazil. Brazil was ranked 14th in the world in terms of installed solar power in 2020. (7.8 GW). In May 2021, Brazil's total installed solar power was anticipated to be around 9.4 ...
