

Overview

How much does a 5 kW solar system cost in India?

The cost of a 5 kW solar system in India typically ranges from INR 2.5 to 4 lakhs. This price includes the cost of solar panels, inverters, mounting structures, wiring, and installation. Maintenance costs are relatively low, as solar systems are designed to be durable, requiring only periodic cleaning and inspection.

Which Solar System is best in India?

An on-grid framework is by far the best deal for budget-conscious homeowners looking for an affordable 5kW solar system in India. Solar batteries are the second most costly component in any home solar system after the indispensable solar panels.

Should you buy a solar system in India after subsidy?

If you have been on the fence about solar due to its overwhelming initial investment, the solar system for home prices in India after subsidy is worth considering. The new simplified rooftop scheme by MNRE gives individual solar buyers the liberty to choose from rooftop solar companies in India to get solar plants for homes.

How many households in India have rooftop solar power systems?

File photo: Solar panels installed on top of an apartment building in J P Nagar, as part of a rooftop solar power plant, in Bangalore on December 22, 2022. India currently has 6.7 lakh households with rooftop solar power systems, as per Minister for Power and New and Renewable Energy R.K. Singh. (Image for representation only).

Can a 5kw Solar System be subsidized in India?

Subsidy: Solar subsidies can reduce the price of your 5kW solar system in India. However, homeowners getting on-grid and hybrid solar systems

(excluding the cost of solar batteries) are eligible for solar subsidies. There is no subsidy for off-grid solar systems.

How much do solar panels cost in India?

State-wise Price Variations and Regional Considerations The cost of PV panels, inverters, and mounting structures typically accounts for the majority of the expenses, around ₹30,000 to ₹50,000 per kW. The Indian government offers various subsidies to promote the adoption of solar energy.
