

Solar power station at the yacht marina

Overview

What are marine solar panels used for?

The marine solar generators and panels can be used as backup energy for the boat, restore the boat's batteries and power various appliances in the boat.

Q3: What are the pros of solar panels?

.

What are marine solar generators and panels?

Marine solar generators and panels convert solar energy into electricity for boats. They are installed on the boat to provide power for electrical appliances, such as a laptop and mobile phone, while sailing. The solar generator ensures you enjoy the benefits of solar energy on your boat.

Should you install solar panels on your boat?

Weekend sailors might be content with a small panel to recharge – over the course of a week – the energy used during a weekend's sailing. Getting the balance right is important, especially if you want to install enough boat solar panels to more or less cover your power requirements.

Where can I buy marine solar panels?

You can purchase marine solar panels directly from us and build up your own solar power system, or speak to our team of wind and solar experts about planning your energy needs for your trip to ensure your power system reliability.

How does a marine solar panel produce energy?

Marine solar panels produce energy by converting solar energy into electrical power. The amount of solar energy that heats the surface of the panel determines the amount of power the panel generates.

Are boat solar panels worth it?

There are many other benefits to boat solar panels too: First and foremost, they work all on their own – solar panels are automatic, so you can just let them get on with the job. Apart from the occasional wipe over and a wiring check, they're largely maintenance-free too.
