Will Brazil hold a large-scale energy storage auction in 2025?

The Brazilian authorities say they plan to hold a large-scale energy storage auction in 2025, potentially creating a market for large-scale storage facilities in the country. From pv magazine Brazil.

Is solar energy the fastest growing energy source in Brazil?

Despite being the fastest-growing energy source, solar energy represents less than 10% of total energy consumption in Brazil. In 2023, more than 70% of solar energy capacity additions were from distributed generation. However, access to financing is still limited, with 78% of customers experiencing difficulties in 2022.

Will Brazil's energy auction improve power grid reliability?

Interest in the auction has been expressed by power companies such as Portugal's EDP and Brazil's ISA Energia. The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar. US Tariffs are shifting - will you react or anticipate?
