

# **Solar support factory recruits people**

## Overview

---

How many solar jobs are there in the UK?

In 2019, the solar industry employed 10,900 people within the UK. Jobs levels increased to approximately 16,000 in 2021 and are forecast to continue growing. The latest Energy Whitepaper will facilitate the potential development of more than 200,000 green industry jobs in the UK.

Will solar power boost UK jobs in 2025?

The International Energy Agency believes renewable energy will make up 95% of the total global power capacity by 2025, with solar representing a vital energy source, likely driving a significant rise in solar jobs in the UK. Until more recently, solar represented a fraction of electricity production and energy sector jobs in the UK.

What jobs are available in the solar industry?

The solar industry offers opportunities to work in science, engineering, manufacturing, construction, and installation. Scientists, for example, typically focus on research and development of new solar materials, and engineers are involved in designing new solar technology and enhancing existing systems.

How does solarjobs work?

When a candidate registers with SolarJobs they are given access to a free candidate management system. This allows the candidate to upload and edit their CV, set up job alerts by email that immediately notifies them of suitable job opportunities, add jobs to a wish list and track all the applications that they have made to suitable job postings.

What skills do you need to start a solar project in Spain?

Proven experience (minimum 5 years) in land acquisition and development of large-scale solar PV or renewable energy projects in Spain. In-depth knowledge of environmental regulations and socio-economic development in

the context of utility-scale renewable energy generation projects.

Are solar engineers in demand?

Over the last few years, there has been a rising demand for skilled photovoltaic installers, solar electricians, and solar PV roofers. There is rising demand for more engineers to work in the solar industry - from general mechanical, design and environmental to technical solar engineers.
